

INSTRUCTION TO ASSEMBLE

MATERIALS - Plexiglas & Cork

PARTS - 19 pieces

a. $2(1\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8})$, b. $2(4 \times 4 \times \frac{1}{4})$, c. $8(3 \times 1\frac{1}{2} \times \frac{1}{8})$, d. $4(23 \times 1\frac{1}{2} \times \frac{1}{8})$

e. $2(1\frac{1}{2} \times \frac{1}{8})$, f. $1(16 \times 8 \times \frac{1}{8})$

1. Top section - consist of seven pieces (one $14 \times 10 \times \frac{1}{8}$ and one $5 \times 5 \times \frac{1}{4}$ and one $4 \times 4 \times \frac{1}{4}$ and four $3 \times 1\frac{1}{2} \times \frac{1}{8}$). The $5 \times 5 \times \frac{1}{4}$ piece is glued to center of $16 \times 11 \times \frac{1}{8}$ with a $4\frac{1}{2}$ inch edge on either side of 11 length. Then the $4 \times 4 \times \frac{1}{4}$ is glued to the center of $5 \times 5 \times \frac{1}{4}$ with $\frac{1}{2}$ inch edge. Next the four $3 \times 1\frac{1}{2} \times \frac{1}{8}$ cuts are glued lengthwise to form square and the $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$ and is glued to center of $4 \times 4 \times \frac{1}{4}$ piece with 1 inch edge to form square cup.

2. Center section - consist of six pieces (four $25 \times 1\frac{1}{2} \times \frac{1}{8}$ and two $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$ and $1\frac{1}{2}$ inch square cork. The four 25 inch pieces are glued together lengthwise to form square tube. Then one of the $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$ is glued to one end of the 25 inch tube. The cork is glued to the flat surface side of the second $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$. Next the detachable cork is placed into the open end of 25 inch tube.

3. Base section - consist of six pieces (one $5 \times 5 \times \frac{1}{4}$ piece and one $4 \times 4 \times \frac{1}{4}$ Piece and four $3 \times 1\frac{1}{2} \times \frac{1}{8}$ pieces). The $4 \times 4 \times \frac{1}{4}$ piece is glued to one flat surface of $5 \times 5 \times \frac{1}{4}$ centered in middle with $\frac{1}{2}$ inch edge around it. Four $3 \times 1\frac{1}{2} \times \frac{1}{8}$ sides are glued together to form square. One end of $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$ square is glued to center of $4 \times 4 \times \frac{1}{4}$ section with 1 inch edge around to

5a.

form square cup.

The three sections are easily assembled and disassembled. The tube end without the cork is easily inserted into the base cup to assemble and the end containing the cork is inserted into the top section's cup. Reverse directions for disassembling.
